## Catálogo de Aplicações e Referências Cruzadas

Uma linha completa de filtros para as mais  
diversas aplicações

ENGINEERING YOUR SUCCESS.

## **Termo de garantia**

A Parker Hannifin Ind. e Com. Ltda, Filtration Division, doravante denominada simplesmente Parker, garante os seus produtos pelo prazo de 12 (doze) meses, incluído o da garantia legal (primeiros 90 dias), contados a partir da data de seu faturamento, desde que instalados e utilizados corretamente, de acordo com as especificações contidas em catálogos ou manuais ou, ainda, nos desenhos aprovados pelo cliente quando tratar-se de produto desenvolvido em caráter especial para uma determinada aplicação.

## **Abrangência desta garantia**

A presente garantia contratual abrange apenas e tão somente o conserto ou substituição dos produtos com defeito de fabricação fornecidos pela Parker. A Parker não garante seus produtos contra erros de projeto ou especificações executadas por terceiros.

A presente garantia não cobre nenhum custo relativo à desmontagem ou substituição de produtos que estejam soldados ou afixados de alguma forma em veículos, máquinas, equipamentos e sistemas. Esta garantia não cobre danos causados por agentes externos de qualquer natureza, incluindo acidentes, falhas com energia elétrica, uso em desacordo com as especificações e instruções, uso indevido, negligência, modificações, reparos e erros de instalação ou testes.

## **Limitação desta garantia**

A responsabilidade da Parker em relação a esta garantia ou sob qualquer outra garantia expressa ou implícita, está limitada ao conserto ou substituição dos produtos, conforme acima mencionado.

## **ADVERTÊNCIA**

**SELEÇÃO IMPRÓPRIA, FALHA OU USO IMPRÓPRIO DOS PRODUTOS  
DESCRITOS NESTE CATÁLOGO PODEM CAUSAR MORTE,  
DANOS PESSOAIS E/OU DANOS MATERIAIS.**

As informações contidas neste catálogo da Parker Hannifin Ind. e Com. Ltda. e seus distribuidores autorizados, fornecem opções de produtos para aplicações por usuários que tenham habilidade técnica. É importante que você analise os aspectos de sua aplicação, incluindo consequências de qualquer falha, e revise as informações que dizem respeito ao produto contido neste catálogo.

Devido à variedade de condições de operações e por aplicações para estes produtos, o usuário, através de sua própria análise e teste, é o único responsável para fazer a seleção final dos produtos e também para assegurar que o desempenho, a segurança da aplicação e os cuidados especiais requeridos sejam atingidos.

Os produtos aqui descritos com suas características, especificações e desempenhos são objetos de mudança pela Parker Hannifin Ind. e Com. Ltda., a qualquer hora, sem prévia notificação.

# Como fazer a manutenção correta de seu filtro de combustível

A retirada da água do combustível é fundamental para a “saúde” do motor, principalmente hoje com a evolução dos motores diesel, onde cada vez mais se aplicam monitoramentos eletrônicos e bombas de injeção que requerem um combustível dentro de padrões rígidos de limpeza e ausência de água. Para que seu filtro do combustível funcione adequadamente e tenha uma vida útil estendida confira as dicas para manutenção e troca do elemento:

## Para drenar a água

- Verificar visualmente no copo transparente a presença de água;
- Abrir o respiro no cabeçote;
- Abrir o dreno e esgotar toda a água do copo;
- Fechar o dreno e o respiro;
- Preencher o filtro com combustível, caso necessário;
- Funcionar o motor.

## Para troca do filtro combustível

- 1 - Abrir o respiro no cabeçote;
- 2 - Abrir o dreno e esgotar todo o combustível do filtro;
- 3 - Remover o copo e o filtro do cabeçote;
- 4 - Remover o copo e limpar o assento do o’ring;
- 5 - Colocar novo o’ring lubrificado com óleo limpo (acompanha todo filtro novo);
- 6 - Apertar manualmente o copo no filtro;
- 7 - Montar o filtro+copo no cabeçote, rosqueando de 1/2 a 3/4 de volta após o encosto;
- 8 - Pressionar a bomba manual até que saia combustível pelo plug respiro;
- 9 - Fechar plug respiro;
- 10 - Acionar o motor e verificar possível vazamento ou entrada de ar.

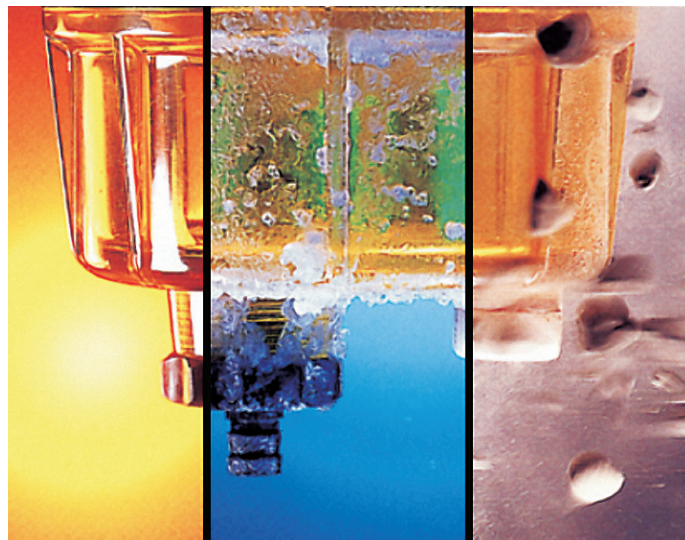

### Importante:

Não utilizar ferramentas para montagem do filtro. Na desmontagem pode-se utilizar a chave apropriada para retirada do copo ou uma cinta de couro, removendo o filtro. Dicas para aplicação correta dos filtros.

Devemos sempre aplicar o filtro especificado originalmente pela montadora, respeitando cada aplicação.

Vazão e micronagem são os fatores mais importantes na aplicação de um filtro.

**Verifique ao lado alguns exemplos práticos de aplicações incorretas mais comuns:**

**Os Filtros do Combustível Separador de Água Racor** fazem parte hoje de todos os veículos e equipamentos que utilizam-se do diesel como combustível. Estes filtros são fabricados com o papel Aquabloc®II, repelente a água e estão dentro dos padrões das normas internacionais. Vantagens da aplicação do copo transparente dos filtros Racor:

- Os copos transparentes são de Nylon, injetados sobre pressão e altamente resistentes. A água acumulada no copo não provoca oxidação como ocorre normalmente nos filtros com carcaça metálica fechada.
- Existe a possibilidade de controle visual do abastecimento feito na bomba de combustível.
- O copo transparente possibilita a rápida visualização da água acumulada pela separação.
- Água acumulada em abundância e não drenada (ocorrência típica em filtros com carcaça metálica fechada que não permite a visualização) causa aumento de restrição, redução da vida do elemento, perda de potência e até mesmo “calço hidráulico” no motor em casos extremos.
- Água facilmente drenada sem perda de combustível.
- O copo transparente não necessita obrigatoriamente da presença de sensor elétrico de água pois pode-se ter a visualização da separação de água no próprio copo.
- Em todos os tipos de filtros do combustível separador de água Racor existem kits de reposição, tais como: drenos, copos, manipuladores, esferas, etc.

# Kit filtro do combustível / Fuel filter kit / Kit filtro de combustible

## RCK-40012

- Pré-Filtro do Combustível Separador de Água
- Filtro Final do Combustível

**Aplicação:** caminhões Volvo (VTC) (20480593, 20510654) FH e NH12 com motor D12D, fabricados a partir de setembro de 2003.

## RCK-40013

- Pré-Filtro do Combustível Separador de Água
- Filtro Final do Combustível

**Aplicação:** P/N: R28-30M (2R0201511) e RC-347-AQ (9.0541.15.1.0023), caminhões VW 7.100, 8.100, 8.100, 8.150 MWM 4.10 NA/TCA Série 2000.

## RCK-40014

- Pré-Filtro do Combustível Separador de Água
- Filtro Final do Combustível

**Aplicação:** P/N: RC-353-HP (9.0541.15.1.0027), R120L-10M-AQII (2R0201512A, 2R0127177C), caminhões VW Titan Tractor Constellation 8.150E, Worker 8.150E, 13.170E, 15.170E, 17.250E, caminhões Volvo VM.

## RCK-40015

- Pré-Filtro do Combustível Separador de Água
- Filtro Final do Combustível

**Aplicação:** P/N: R120-10M (1518512), RC-345, motores Scania DSC9-12, DSC11-75, DSC12-02 Turbo e Intercooler, DC 12, DSC 12-01 Série 4, de junho 1998 a agosto 2002.

## RCK-40016

- Pré-Filtro do Combustível Separador de Água
- Filtro Final do Combustível

**Aplicação:** P/N: R120-10MB-AQII (A979.477.00.15), RI-672, caminhões Mercedes Benz Axor 1933, Axor 2533, Accelo 915C, Axor 2826, Axor 2831, Atego 1315, Atego 1418, Atego 1518, Atego 1718, Atego 1725, Atego 1725 4X4, Atego 2425 6X2, 915 E, L-1318 e 2423 B.

## RCK-40027 (1.959.103)

- Pré-Filtro do Combustível Separador de Água
- Filtro Final do Combustível

**Aplicação:** P/N: RC-381 (1763776) e R120-10M (1518512) Scania Série 4-124 motores 380/400/420 HP

# Filtros Hydrocarbon / Hydrocarbon filters / Filtros de Hydrocarbon

## Filtros Coalescentes Separadores FBO

Os filtros Racor Hydrocarbon FBO foram projetados para condições severas de reabastecimento de combustível e possibilita uma troca rápida dos elementos filtrantes. Os filtros Racor Hydrocarbon FBO permitem aplicações com vazões de 50 lpm/13 gpm a 230 lpm / 60 gpm, dependendo dos elementos instalados e dos combustíveis a serem filtrados.

Os filtros Racor Hydrocarbon FBO podem ser utilizados em reabastecedores móveis ou instalados em pontos de reabastecimento. A unidade também pode ser utilizada com bombas de diesel ou como um filtro primário do combustível/separador de água para grandes motores a diesel.

Sua principal característica é um suporte de travamento que fixa a carcaça ao cabeçote de alumínio fundido através de quatro parafusos. Este suporte de travamento permite soltar os parafusos manualmente, girar e baixar o copo para a troca do elemento. Após a instalação do novo elemento simplesmente levante o copo e gire em direção ao suporte de travamento apertando os parafusos manualmente.

### Aplicações:

- Querosene de aviação (jet fuel), gasolina de aviação, diesel, gasolina, querosene e biodiesel.

### Instalações:

- Caminhões para abastecimento de aviação.
- Pontos de abastecimento.
- Caminhões comboio - de reabastecimento.
- Marinas.
- Sistemas de filtragem para grandes motores diesel.

### Características de projeto padrão:

- Eficiência de separação de água: 99% - até 5 ppm máximo de água livre, respeitando a vazão máxima de cada modelo.
- Eficiência de separação final de sólidos de 90% até 0,5 microns.
- Cabeçote de alumínio fundido.
- Carcaça em aço.
- Componentes com pintura a pó.
- Suporte de travamento, sem abraçadeira.
- Conexões de entrada/saída de 1.1/2" NPT.
- Pressão máxima 150 psi.
- Válvula de drenagem manual.
- Dreno manual.

### Acessórios opcionais:

- Indicador diferencial de pressão.
- Indicador visual do nível de água.

# Geradores de Nitrogênio / Nitrogen generators / Generadores de nitrógeno

## Gerador de Nitrogênio Parker Tyre\$aver

### Por que usar Nitrogênio?

O nitrogênio é um gás seco, inerte, utilizado para melhorar o desempenho em pneus de aviões, caminhões, máquinas agrícolas, de construção civil, veículos militares e carros de corrida. O oxigênio no ar comprimido vaza pela parede do pneu, reduzindo a pressão do ar no seu interior. A passagem do oxigênio pela parede do pneu oxida os compostos de borracha, causando despressurização e conseqüente deterioração. O nitrogênio seco mantém a pressão adequada, evita a despressurização e a corrosão dos aros e faz o pneu rodar mais frio. O resultado é o aumento da segurança e o menor custo operacional.

### Pneu cheio vs. pneu baixo

O enchimento correto é extremamente importante considerando-se a vida útil do pneu e seu desempenho. Nem sempre é possível olhar um pneu e notar que ele está baixo. Um pneu vazio pode originar uma série de problemas. Uma vez que a pressão de enchimento determina a capacidade de carga de um pneu, se ele estiver baixo sofrerá uma sobrecarga. Um pneu baixo opera em alta deflexão e resulta no maior consumo de combustível, baixo desempenho, entorces mecânicos e aumento de temperatura, que levam à perda catastrófica do pneu.

### Veja a opinião dos principais fabricantes de pneus:

- A Michelin apóia a utilização de nitrogênio baseada na capacidade de melhor reter a pressão por mais tempo.  
- *Michelin Technical Bulletin, novembro 2003*
- A Goodyear afirma que uma pressão 15% abaixo da recomendada significa uma vida útil 8% menor e 2,5% a mais de consumo combustível.  
- *Goodyear Radial Truck Tire and Retread Service Manual, pág. 40*
- A Pirelli afirma que uma pressão 20% abaixo da recomendada significa 15% menos de vida útil do pneu.
- A Bridgestone afirma que pneus pressurizados com ar comprimido perdem em média 10% de pressão por mês e os pressurizados com nitrogênio perdem em média 2,5% de pressão por mês.  
- *Guy Walenga, Clmeson Tire Conference, março 2004*
- O Departamento de Energia dos Estados Unidos afirma que o país perde mais de 2 milhões de galões de combustível por dia, por conta de baixa pressão dos pneus.
- A TMC (Technology & Maintenance Council of the American Trucking Association) afirma que cerca de 90% das falhas dos pneus que geram descamação da banda de rodagem são resultantes da baixa pressão.  
- *TMC Tire Air Pressure Study, maio 2002*

### Parker Hannifin, líder em geradores de nitrogênio

- 350 centros automotivos na Alemanha.
- A Volvo nos Países Baixos utiliza nitrogênio para pressurizar pneus.
- A maior companhia de táxi do mundo utiliza os geradores de nitrogênio Parker.
- Os mais renomados fabricantes de equipamentos para centros automotivos usam membranas Parker para geração de nitrogênio.
- Mais de 4.000 unidades em funcionamento no mundo.
- O nitrogênio e os geradores de nitrogênio Parker têm sido utilizados com sucesso há anos para pressurizar pneus de veículos de passeio, caminhões, carros de corrida, veículos militares, máquinas agrícolas, aviões e veículos pesados para construção civil.

## Truck Tyre\$aver

### Características

- Especialmente projetado para pressurizar pneus de caminhões com vazão de 10, 20, 30 e 40 Nm<sup>3</sup>/h, a 95% pureza e 13 bar(g).
- Desligamento pneumático automático quando não houver demanda de nitrogênio, evitando perda de ar.
- Design compacto, utiliza uma membrana de alto desempenho, com a mais alta vazão à temperatura ambiente.

### Como fazer seu pedido:

Modelo	Vazões	Capacidade (295/75R22.5)
TTS-10	10 Nm <sup>3</sup> /H	12 pneus/hora
TTS-20	20 Nm <sup>3</sup> /H	24 pneus/hora
TTS-30	30 Nm <sup>3</sup> /H	36 pneus/hora
TTS-40	40 Nm <sup>3</sup> /H	48 pneus/hora

# Parker Hannifin

## A Parker Hannifin

A Parker é líder global em tecnologias e sistemas de movimento e controle e tem sempre uma solução personalizada para proporcionar máxima rentabilidade aos setores agrícola, móbil, industrial e aeroespacial.

Especializada em desenvolver projetos customizados, a Parker é o único fornecedor capaz de integrar componentes pneumáticos, eletromecânicos, hidráulicos, de filtração, vedações e produtos para condução e controle de fluidos.

O alto padrão de qualidade de nossos produtos garante excelente compatibilidade às linhas de produção, resultando em maior produtividade e menores custos com manutenção.

Tudo sempre acompanhado de perto por uma equipe técnica altamente qualificada.

## No Mundo

A Parker está presente em 48 países, com mais de 52.000 colaboradores diretos. Nossa rede de distribuição autorizada, a maior do segmento, conta com mais de 13.000 distribuidores, atendendo mais de 500.000 clientes em todo o mundo.

## No Brasil

A Parker desenvolve uma ampla gama de produtos para o controle do movimento, fluxo e pressão. Presente nos segmentos industrial, móbil e aeroespacial, a Parker atua com as linhas de automação pneumática e eletromecânica; refrigeração industrial, comercial e automotiva; tubos, mangueiras e conexões; instrumentação; hidráulica; filtração e vedações.

Ao todo são 1.800 funcionários diretos e mais de 300 distribuidores autorizados em todo o país, oferecendo um excelente atendimento, material de treinamento e assistência técnica sempre que necessário.

## Tecnologias de Movimento e Controle

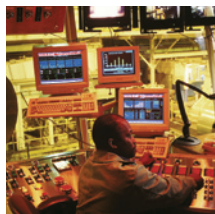

### Aerospace

Líder em desenvolvimento, projeto, manufatura e serviços de sistemas de controle e componentes, atuando no setor aeronáutico, militar, aviação geral, executiva, comercial e regional, sistemas de armas terrestres, helicópteros, geração de potência, mísseis e veículos lançadores.

### Climate Control

Componentes e sistemas para controle de fluidos para refrigeração que proporcionam conforto e praticidade aos mercados agrícola, de refrigeração, alimentos, bebidas e laticínios, resfriamento de precisão, medicina e biociência, processamento, supermercados e transportes.

### Electromechanical

Fornecimento de sistemas e componentes eletromecânicos, de alta tecnologia, que aumentam a precisão e produtividade dos clientes nos setores da saúde, automobilístico, automação industrial, máquinas em geral, eletrônica, têxteis, fios e cabos.

### Filtration

Sistemas e produtos de filtração e separação que provêm maior valor agregado, qualidade e suporte técnico aos clientes dos mercados industrial, marítimo, de transporte, alimentos e bebidas, farmacêutico, óleo e gás, petroquímica e geração de energia.

### Fluid & Gas Handling

Projeta, manufatura e comercializa componentes para condução de fluidos e direcionamento do fluxo de fluidos críticos, atendendo aos mercados agrícola, industrial, naval, transportes, mineração, construção civil, florestal, siderurgia, refrigeração, combustíveis, óleo e gás.

### Hydraulics

Projeta, manufatura e comercializa uma linha completa de componentes e sistemas hidráulicos para fabricantes e usuários de máquinas e equipamentos dos setores industrial, aeroespacial, agrícola, construção civil, mineração, transporte e energia.

### Pneumatics

Fornecimento de sistemas e componentes pneumáticos, de alta tecnologia, que aumentam a precisão e a produtividade dos clientes nos setores agrícola, industrial, construção civil, mineração, óleo e gás, transporte, energia, siderurgia, papel e celulose.

### Process Control

Alto padrão de precisão e qualidade, em projetos, manufaturas e distribuição de componentes, onde é necessário o controle de processos críticos nos setores químico/refinarias, petroquímico, usinas de álcool e biodiesel, alimentos, saúde, energia, óleo e gás.

### Sealing & Shielding

Vedações industriais e comerciais que melhoram o desempenho de equipamentos nos mercados aeroespacial, agrícola, militar, automotivo, químico, produtos de consumo, óleo e gás, fluid power, industrial, tecnologia da informação, saúde e telecomunicações.

ENGINEERING YOUR SUCCESS.
